Professional Summary

Frontend Developer skilled in Next.js, React, Node.js, MongoDB, Tailwind CSS, and Firebase. Experienced in building responsive, production-ready web applications with clean architecture and secure authentication. Delivered fully functional projects like SimpleBlog, ExploreBD, and EduCircle, integrating real APIs, databases, protected routes, and modern UI/UX. Strong problem solver with the ability to learn fast, work independently, and ship scalable features.

Skills

Frontend: Next.js (App Router) | React, JavaScript (ES6+) | TypeScript (learning) | React Router | Tailwind CSS | DaisyUI | Axios | Animations (Framer Motion, React-Spring) | HTML5 | CSS3

Backend: Node.js | Express.js | MongoDB | Mongoose | Firebase Auth | RESTful APIs | JWT Authentication | CORS

State & Forms: TanStack Query (React Query) | Context API | React Hook Form

Tools / Platforms: Git | GitHub | Vercel | Vite | Netlify | VS Code | Stripe

Soft Skills: Problem-solving | Teamwork | Adaptability | Communication | Time Management

Featured Projects

1. Explore BD | Tourism Platform

[Live ↗](#) | [GitHub \(Frontend\) ↗](#) | [GitHub \(Backend\) ↗](#)

Overview: Built a production-level tourism platform with destination exploration, tour packages, booking, and role-based dashboards for tourists, guides, and admins—optimized for smooth, secure, and responsive use.

Key Features / Impact:

- Implemented **role-based dashboards** (Admin, Tourist, Guide) with secure permissions and protected routes.
- Enabled a complete booking flow with Stripe payments, real-time updates, and integrated traveler story sharing.
- Secured the platform using **Firebase Authentication** and **JWT**, ensuring verified access and safe operations.

Tech Stack: React, React Router, Tailwind CSS, Firebase, TanStack Query, Vite, MongoDB, JWT, Node.js, Express.js

2. SimpleBlog | Full-Stack Blogging Platform

[Live ↗](#) | [GitHub ↗](#)

Overview: Built a complete blogging platform with user and admin functionality, allowing content creation, management, and moderation. Features secure authentication, dynamic routing, and a modern, responsive UI.

Key Features / Impact:

- Implemented **secure authentication** and full **CRUD operations** for blog posts via API routes.
- Added a dedicated **Admin Dashboard** for managing users, posts, categories, and site settings.
- Designed a **scalable architecture** with reusable UI components and clean folder structure.

Tech Stack: Next.js 16, React 19, MongoDB, Mongoose, Firebase Auth, Tailwind CSS, DaisyUI, Framer Motion

3. EduCircle | Educational Platform

[Live ↗](#) | [GitHub \(Frontend\) ↗](#) | [GitHub \(Backend\) ↗](#)

Overview: Developed a full-stack platform for creating, submitting, and evaluating assignments with role-based access.

Key Features / Impact:

- Role-based permissions** – edit/delete restricted to creators; evaluators cannot mark their own work.
- Streamlined assignment evaluation** with **status updates** and **feedback**, improving transparency and usability.
- Developed **scalable and maintainable architecture** to support future enhancements.

Tech Stack: React, Tailwind CSS, React Router, Axios, Framer Motion, Firebase, JWT, Node.js, Express.js, MongoDB
